LIGHTING

## EXCITING BELGIAN DESIGN LIGHTING

We all know it, the famous glimpse at the ceiling during which you think: "Well, everyone really does have that light." That's why we strive to achieve lighting solutions that first and foremost fit the description: unique. Who inspires us in the process? People like you, who share our enthusiasm for beautiful things and attach as much importance to noble design as to high-quality workmanship. Does it sound passionate? Well, that's what it is. After all, life is simply far too short for boring lighting.

### ABOUT US

[weverducre.com/about](https://weverducre.com/about)

## LET'S GROW YOUR LOXONE TREE

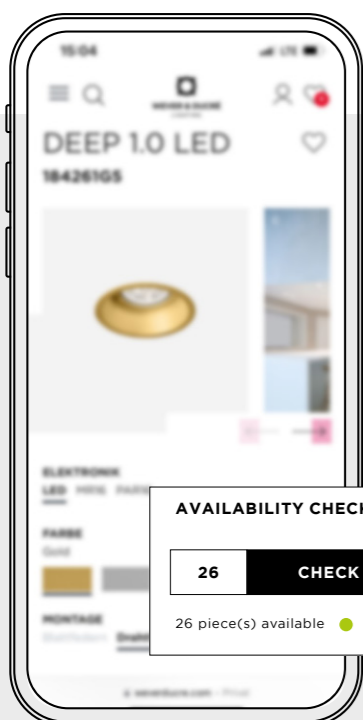

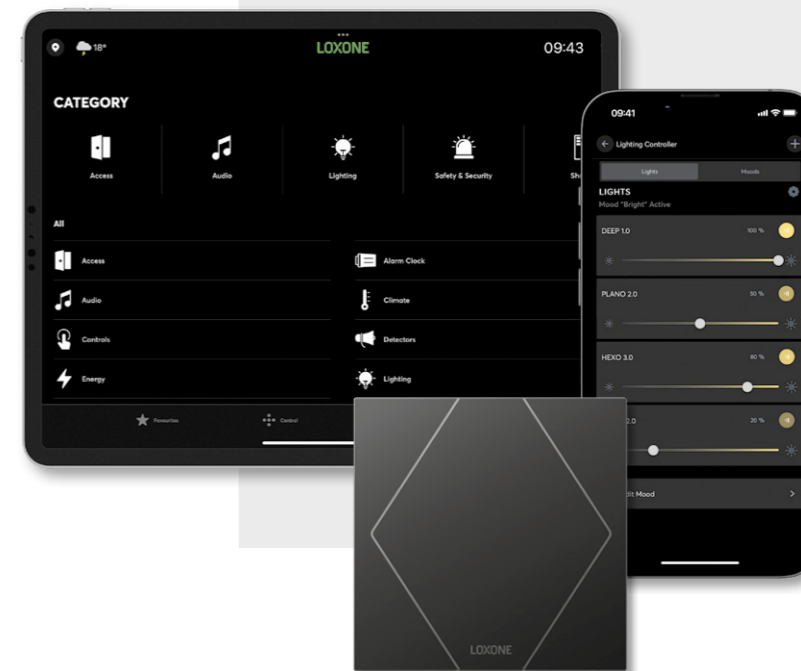

Whether at home, in the office, or in a restaurant – Loxone's intelligent home and building automation makes your everyday life not only easier, but also more comfortable and safer. A central mini-server controls all components – be it the lighting, the security system, or the heating – from a single point. For you, this means more control, more energy efficiency, and a significantly easier life. The Loxone app helps you keep an eye on everything.

### LOXONE TREE SYSTEM

[weverducre.com/en/loxone-tree](https://weverducre.com/en/loxone-tree)

The Loxone system makes planning easy and is installed in just a few simple steps. It flexibly adapts to your needs and circumstances. This means that your lighting can do more than just create bespoke lighting moods. It provides practical functions too – from silent doorbells, alarms and alarm clocks to automated night lights. All these functions are intelligently interconnected and easy to control.

### AVAILABILITY CHECK

## FOR EVERYONE DELIVERED FAST

Well, that's the way it is with our lights: Once you've fallen in love with a design, you naturally want to have it with you immediately. The good news is that we dispatch all products within just 48 hours. So simply check your favourite design's availability online. In the meantime, you can get inspired for your next project.

### PICTURE GALLERY

## HIGH END OUTSIDE, SMART INSIDE

Their extraordinary design is not the only reason our lights are simply unforgettable. We are also continuously developing the technology that lies at their heart. The best example of this is our brand-new LED engine which seamlessly connects to Loxone's intelligent building automation system via plug & play. This makes it easy to implement projects both large and small.

### WORKS WITH LOXONE

[weverducre.com/en/loxone](https://weverducre.com/en/loxone)

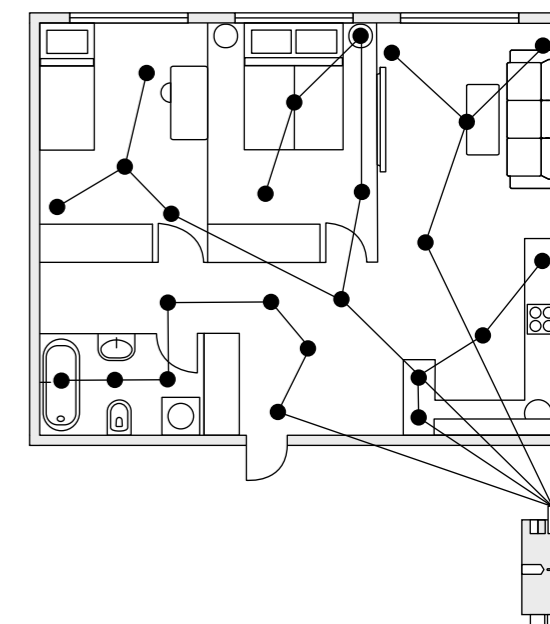

## PHASE-CUT? OF COURSE

This sounds really great, but does your favourite model unfortunately not have a compatible LED engine? No problem, our lights with phase-cut dim integrate into the system with a quick trick. Simply add a dimmer extension and your favourite light will magically create exactly the mood you want.

### PHASE-CUT COLLECTION

## EXTEND YOUR TREE WITH DALI

Have you found your favourite light from the DALI collection? Then it can also be integrated into your building automation using the Tree system. All you need is the Loxone DALI extension. Pretty ingenious, right?

### DALI COLLECTION

PRIVATE

# Let's get cosy

After a long day at work, do you just want to snuggle on the sofa? Then let our lights create the perfect mood: gently dimmed light that helps you relax and unwind. So just stay nice and cosy and let the Loxone system take care of your lighting. Whether in the kitchen, bathroom, or bedroom – your lights will wow you with the perfect ambience. It really does not get any more convenient than this. And the best thing is that it comes with functions such as presence simulation, night light, fade-in, fade-out, and safety features. Light only when someone is present and depending on the time of day. Perfect for every room, every mood, and every moment.

COMMERCIAL

## Let's talk about *business*

After work, you can relax on your way home knowing that no one will have forgotten to turn off the lights. This is just one of the many advantages of the Loxone system. You can use our lights to create perfect, personalised moods in every room, automated and, if you wish, with just one click to switch to the next lighting scene. Energy efficiency through presence detection. When somebody is present, perfect work lighting for the kitchen team? No problem. That is just as easy to implement. The system also automatically provides the appropriate light and audio ambience, seamlessly transforming from a energetic morning atmosphere to an relaxed evening mood. And it gets even better: Thanks to its Tree technology, the amount of cabling needed is reduced by up to 80%, and the system is up and running in record time. A perfect solution for anyone who likes their workplace to be both attractive and efficient, whether it is a hotel, a shop, or an office.
